## EDUCATION

### B. Tech

#### Arya College of Engineering and Information Technology

07/2013 – 05/2017 *Kukas, Jaipur, Rajasthan, India (61%)*

##### Courses

- Computer Engineering

### 12th

#### LK Singhania Education Centre

04/2012 – 03/2013 *Gotan, Nagaur, Rajasthan, India (64.5%)*

##### Courses

- PCM

## WORK EXPERIENCE

### Hadoop Intern

#### Adhoc Networks

08/2017 – 10/2017 *Jaipur, Rajasthan, India*  
[www.adhocnw.org](http://www.adhocnw.org)

##### Achievements/Tasks

- Successfully completed training for Hadoop by deploying own Hadoop cluster under the platform of RHEL 7.2 with the power of Python CGI, web front end using HTML5 by integrating DevOps automation tool Ansible and Docker.

### Cloud Intern

#### Adhoc Networks

06/2017 – 08/2017 *Jaipur, Rajasthan, India*  
[www.adhocnw.org](http://www.adhocnw.org)

##### Achievements/Tasks

- Successfully completed training for Orchestration of your hardware resources by deploying own Cloud under the platform of RHEL 7.2 with the power of Python CGI, web front end using HTML5 by integrating DevOps automation tool Ansible and Docker.

### Android Intern

#### C-DAC

05/2016 – 07/2016 *Jaipur, Rajasthan, India*

##### Achievements/Tasks

- Successfully completed training for Android Development and programming with the help of tools like Android Studio and Eclipse IDE using JAVA and also completed project "EasyDine" under the same.

## SKILLS

Python C C++ JAVA SQL Hadoop

AWS Docker Data Structures OOPs

Leadership Presentation Skills Target Oriented

Good Inter-personal communication

## PERSONAL PROJECTS

### EasyDine (05/2016 – 07/2016)

- It is an Android Application that can be used by restaurants to eliminate human error while taking orders. It also calculates the total order amount in real time to help customer know how much they are spending.
- Tech Stack: Android Studio, JAVA, XML, SQLite, Photoshop.

### Luggage Tracing System (05/2017)

- It is an Android application that uses the IOT to track luggage in real time at the Airport and updates the staff and owner about its current location/stage. It can help in reducing the occurrence of misplaced luggage and also gives the ability to the customer to track their luggage.
- Tech Stack: Android Studio, JAVA, XML, Firebase, NFC Tags and Readers.

### Salary Management System (2012)

- It is a project which manages a company's employee details with their loan amount and also prints their salary slip. The user when enters to the project will find many options to go through.
- Tech Stack: C++ with file handling.
